✓ Willingness to Learn new things

- Open to learning new things such as technology and tools.
- Try new task that may improve my skills.
- Can adjust to new systems, tools, or environments quickly.

Projects Developed

★ Product Inventory Management System

Developed a QR code-based system to track inventory from production, QC, warehouse, to delivery. Enables real-time monitoring with accurate timestamps for full product traceability. Reduces manual errors through automated data entry and secure transaction logging. Improves workflow efficiency, inventory visibility, and decision-making across departments.

★ <Company Name> Attendance and HRIS System

Developed a web-based system for managing employee time-in and time-out records. Automates attendance tracking, reducing manual errors and ensuring accurate data. Provides reliable reports for HR and improves workforce monitoring and transparency. Enhances productivity and ensures compliance with attendance policies.

★ Machine Monitoring System

An actual monitoring visual that displays the actual situation of Machine like when it was on Idle, Running and Under Maintenance.

Education Attainment

🎓 College

Bachelor of Science in Computer Engineering (BSCpE)
Commonwealth Quezon City, 2015 - 2020

🎓 HighSchool

Makiling National HighSchool, 2011 - 2015

🎓 Elementary

Makiling Elementary School, 2011
